Director, Affiliated Programs
Joslin Diabetes Center

Do ACOs Improve Clinical and Cost Savings for
Diabetes?

Marcia Guida James, MS, MBA, CPC, Vice President, Accountable Care, Mercy Health System

Richard M. Bergenstal, MD, Executive Director, International Diabetes Center at Park Nicollet

Harry L. Leider, MD, MBA, FACPE, Chief Medical Officer and Group Vice President, Walgreens

Jeremy Orr, MD, MPH, Physician Director, Provider Solutions, Humedica

Learning Outcomes

- Lines are blurring between payers and providers
- In order for collaboration to work, payers and providers must work together to leverage each other's strengths
- Aggregation of all data sources, including EMR data, claims and demographics, can give organizations a significant advantage in managing populations
- The most effective predictive models incorporate multiple data sources, use granular clinical terms and are trained on large data sets
