21st Century Joslin: Strength In Numbers
Dear Friends,

At Joslin, strength in numbers can mean many things. As the dapper gentleman on the cover suggests, it can point to a life lived long and well, with few if any complications for those diagnosed with type 1 diabetes. When 89-year-old Spencer Wallace accepted Joslin’s first 80-Year Medal last April, that moment—and number—marked a milestone for Mr. Wallace and for all of us at Joslin who are mission-focused on finding a cure.

Strength in numbers is revealed, too, in the 20,000 square feet of renovated laboratory space in the just-completed Translational Center for the Cure of Diabetes—a marvel of private/public partnership between Joslin and the Massachusetts Life Sciences Center (MLSC).

So great is its promise that the Center inspired the largest gift to date for a capital project at Joslin—$5 million from the MLSC and a remarkable $5.8 million from Joslin’s own family of donors.

The April ribbon-cutting with special guests Massachusetts Governor Deval Patrick and Massachusetts Life Sciences President Susan Windham-Bannister signifies a new era of scientific inquiry designed to speed advances back and forth between the laboratory and clinic so that as findings emerge, they can be rapidly translated into new treatments.

And strength in numbers is unmistakably evident in the $24.3 million NIH grant to fund a Joslin-led study for a potential new treatment for kidney disease in individuals with type 1 diabetes. Given the near epidemic incidence of this serious complication, the award is validation of the importance of this research and affirmation of Joslin’s high regard within the scientific community. Alessandro Doria, M.D., Ph.D., Joslin Investigator in the Section on Genetics and Epidemiology, will lead a five-year clinical trial together with his co-Principal Investigator, Michael Mauer, M.D., Professor of Pediatrics and Medicine at the University of Minnesota Medical School to conduct research at the eight institutions in the United States and Denmark that make up the Preventing Early Renal Function Loss in Diabetes (PERL) Consortium.

When you read through the enclosed magazine Innovation and Impact, you will discover more numbers that represent the strength of Joslin’s resolve to build bridges between science and industry in our ongoing quest for better treatments and ways to prevent and cure diabetes.

Little of this would be possible without private philanthropy. These inspirational markers came at the heart of the $100 million annual Giving Campaign, our Joslin’s 2013 fiscal year (October 1, 2012 through September 30, 2013).

The Elliott P. Joslin Society acknowledges the generosity of donors who contributed outright gifts, including payments on pledges, totaling more than $1,000 or more during Joslin’s 2013 fiscal year (October 1, 2012 through September 30, 2013).

Longtime trustee and Joslin champion Ann Lagasse (center), her son Charlie (left) and High Hopes Gala speaker Charlie Kirkham (right) at a moment at the November 2013 Gala. 500 guests came out to salute the evening’s honorees, the 12 members of Joslin’s 2013 Boston Marathon team who were presented the 2013 Global Achievement Award. Thanks to the generosity of many, the High Hopes Gala raised $1.2 million to support Joslin’s mission.

JOSLIN DIABETES CENTER | 2013 HONOR ROLL
Some of Edward R. Koller, Jr.’s earliest memories of Joslin Diabetes Center hark back nearly 30 years to when his son Edward “Eddie” Koller III was running through the halls singing the soundtrack from the musical “Annie” to the delight of nurses, patients and doctors. “Those were the days” says Ed, “when Joslin had its in-patient unit. In the most supportive of settings, his [late] mother and I learned what we had to do to keep our son as healthy as possible after his diagnosis of type 1 diabetes at age three.”

“We did our research,” says Koller. “We lived in Westchester County but knew that Joslin was – and is to this day – the standard-bearer of excellence in all things diabetes. So we’d travel from New York for periodic check-ins with Joslin’s pediatric specialists and also made sure that Camp Joslin was part of Eddie’s summer experience.” Now 35 years-old, Eddie continues to practice his daily diabetes management while he works alongside his father in the highly regarded executive search firm, the Howard-Sloan-Koller Group.

Ed’s Joslin philanthropy began soon after his son’s diagnosis. First, he named a resource and teaching room. Then came the E.R. Koller, Sr. Campership in 1987. The fund honors the memory of Ed’s father and has grown in value to nearly $300,000; both of Ed’s sons, Ross and Eddie, have also contributed. Like the lyrics sung by his young son, Ed Koller is the kind of man you can easily imagine thinking, “The sun’ll come out, tomorrow…” He is optimistic yet pragmatic with an abiding desire to improve the lives of those less fortunate. He freely admits to the thrill of instant gratification and during a recent visit to Boston for a meeting of Joslin’s Foundation Board of which he is a member, Ed said, “Let’s put together a program that will change people’s lives!”

Ed’s desire to give a major “assist” to Joslin patients has come in the form of a generous gift to increase patient access to Joslin’s signature DO IT (Diabetes Outpatient Intensive Treatment) Program and the Eleanor Chesterman Beatson Child Life Pediatric Care Ambassador Jumpstart Program.

Both programs – DO IT for adults and JumpStart for children, teens and their families – are modeled after the original building blocks central to Dr. Elliott Joslin’s diabetes treatment and education philosophy. Each incorporates multi-disciplinary approaches that include behavioral health techniques, family education and a plan for ongoing communication with Joslin case managers and pediatric “care ambassadors” beyond the programs’ timeframes.

Until now, many patients were unable to take advantage of the four-day intensive DO IT program either because of health insurance restrictions or the prohibitive cost of travel and accommodations. Thanks to the newly created Ed, Ross and Eddie Koller DO IT Scholarship those barriers are now eliminated. To date, 13 patients have been able to enroll in the program. Many more will follow. The stream of thank-you notes is validation enough that in just a short period of time, Ed has already accomplished what he set out to do – change people’s lives.

“If you want to be involved, if you want to help find a cure, you deal with Joslin,” states Koller. “Joslin has been a wonderful, worthwhile experience for me. I’m a happy contributor – everyone should do what they can.”

Philanthropist Edward Koller, Jr. recognizes Joslin excellence with gift to support patient care and education

To whom it may concern,

I would like to thank you for your kindness, Matt. This allowed me to participate in the DO IT Program, which I have been working to complete for a while now, but given the opportunity to try it myself and my diabetes. This is a great program and my hope is that more people can come ever learn how to take control of their diabetes.

I will forever be grateful for all you’ve helped me and my family. More than you know.

Thank you for entrusting your business to me.

Edward Koller

DO(ing) IT right

Left to right, are Eddie, Ed and Ross Koller.
This page lists numerous names, likely individuals or entities, and some text that appears to be a dedication or recognition, but the specific content is not clear due to the nature of the text.
A round of applause…

…an affirmation of focus

Congratulations to one and all!

Your support brings out the best in Joslin’s team of scientists, clinicians and educators. This year, many were recognized for their notable achievements and contributions to advancing diabetes research, care and education.

**Fellow**
American Association for the Advancement of Science
Susan Bonner-Weir, PhD
Senior Investigator, Section on Islet Transplantation and Cell Biology
Professor of Medicine, Harvard Medical School

“This is such an honor. I’ve had enormous pleasure delving in the fascinating science of the pancreatic beta cell, which hopefully will lead to help for people with diabetes. When I first started in this field, researchers thought you were born with all the beta cells you would ever have. But in collaboration with a lot of different people, I’ve shown through different experimental situations, both the number and the size of beta cells can change.”

**2014 Armen H. Tashjian Jr. Award for Excellence in Endocrine Research**
Harvard School of Public Health
Aaron Cypess, MD, PhD, MMSc
Assistant Investigator, Section on Integrative Physiology & Metabolism
Staff Physician
Assistant Professor of Medicine, Harvard Medical School

“This award fits right in with Joslin’s dedication to diabetes research. We are an institution committed to research and this is an affirmation of Joslin’s focus. Dr. Tashjian could do basic science, but he also had significant achievements in direct practical clinical applications, which is something I strive for as well.”

2014 Albert Renold Award
American Diabetes Association
Edward Horton, MD
Senior Investigator, Joslin Diabetes Center
Professor of Medicine, Harvard Medical School

“This is a very special award for me as well as for my wife, Betty, since Albert Renold and his wife, Jacqueline, were close friends and mentors of ours. They taught us that supporting young physician scientists and their families and helping them establish their own careers as independent investigators and clinicians were one of the great joys in life.”

Wallace H. Coulter Lectureship Award
American Association for Clinical Chemistry
Helmholtz Diabetes Award
Helmholtz-Nature Medicine Diabetes Conference
C. Ronald Kahn, MD
Chief Academic Officer
Head, Section on Integrative Physiology and Metabolism
Mary K. Iacocca Professor of Medicine, Harvard Medical School

“These awards are very special since they represent recognition by two very different groups of scientists. The Helmholtz Award comes from colleagues in the diabetes field, many of whom I have known for years. The Coulter Award is from the Association for Clinical Chemistry. These are scientists who run hospital clinical labs. To see their interest in fundamental diabetes research is evidence of looking at its implications for the future.”

2014 Kelly West Award in Epidemiology
American Diabetes Association
Andrzej Krolewski, MD, PhD
Head, Section on Genetics and Epidemiology
Professor of Medicine, Harvard Medical School

“For the past 30 years, Dr. Krolewski has been the driving force behind the efforts to use epidemiology to understand the causes of diabetic nephropathy," noted Alessandro Doria, MD, PhD, MPH, Investigator, Section on Genetics and Epidemiology, Director, Genetics Core. “He is never afraid to challenge prevailing beliefs and he has shaped the way in which we currently think of this diabetic complication.”

Nancy Jones Diabetes Champion Award for Research
Juvenile Diabetes Research Foundation
Lori Laffel, MD, MPH
Chief, Pediatric, Adolescent and Young Adult Section
Associate Professor of Pediatrics, Harvard Medical School

“I am honored to receive this award and am grateful to the JDRF for their tireless efforts to fund research aimed at advancing approaches to finding a biologic or technologic cure for diabetes, preventing acute and chronic diabetes complications, and improving care for persons with type 1 diabetes of all ages.”

2014 Outstanding Diabetes Educator Award
American Diabetes Association
Katie Weinger, EdD, RN, FAADE
Investigator, Section of Clinical, Behavioral and Outcomes Research
Associate Professor of Psychiatry, Harvard Medical School

“This is the most prominent award for the field of diabetes education in the world,” said George King, M.D., Chief Scientific Officer and Senior Vice President at Joslin. “To be awarded this recognition, the recipient has to have made extraordinary contributions to the field of diabetes education, and Dr. Weinger fulfills this requirement perfectly.”

2014 Armen H. Tashjian Jr. Award for Excellence in Endocrine Research
Harvard School of Public Health
Aaron Cypess, MD, PhD, MMSc
Assistant Investigator, Section on Integrative Physiology & Metabolism
Staff Physician
Assistant Professor of Medicine, Harvard Medical School

“This award fits right in with Joslin’s dedication to diabetes research. We are an institution committed to research and this is an affirmation of Joslin’s focus. Dr. Tashjian could do basic science, but he also had significant achievements in direct practical clinical applications, which is something I strive for as well.”

Wallace H. Coulter Lectureship Award
American Association for Clinical Chemistry
Helmholtz Diabetes Award
Helmholtz-Nature Medicine Diabetes Conference
C. Ronald Kahn, MD
Chief Academic Officer
Head, Section on Integrative Physiology and Metabolism
Mary K. Iacocca Professor of Medicine, Harvard Medical School

“These awards are very special since they represent recognition by two very different groups of scientists. The Helmholtz Award comes from colleagues in the diabetes field, many of whom I have known for years. The Coulter Award is from the Association for Clinical Chemistry. These are scientists who run hospital clinical labs. To see their interest in fundamental diabetes research is evidence of looking at its implications for the future.”
Celebrating partnerships and community is a longstanding tradition at Joslin.

As Joslin’s Community Partnership program extends its reach, we are inspired by the creativity, courage and entrepreneurial spirit of hundreds of new organizers across the country. Each event underscores the power of grassroots initiatives to effect change, inspire community and cultivate a “can-do” attitude in all who participate.

In 2013, thousands of adults and children ran, walked, bowled, golfed, played wiffleball and dodgeball, skated, shopped, went to the movies, and dined out to raise critical revenue streams — nearly $510,000 — for Joslin’s High Hopes Fund.

Many of our loyal partners are nearing their tenth year of supporting Joslin; here we give a shout out to the creators/motivators of Dodging Diabetes® who in nine seasons, have raised close to $94,000 for Joslin research!

In our next issue, we hope to have the opportunity to speak with our newest participants — Joslin’s first entrants in the Chicago Marathon. You can read more about Elizabeth and Anna’s first “green” Dodging Diabetes® tournament at www.dodgingdiabetes.org/going-green/. We hope to continue to raise our profile in the D.C. area to attract more organizers, more sponsors and more supporters — and to inspire others to create their own unique events to raise money for diabetes research and treatment!

Washington D.C. natives Elizabeth Kramer Dugan and Anna Tiedeman Irwin both have younger brothers with type 1 diabetes. Their shared bond and desire to raise funds for Joslin research and care inspired them to launch Dodging Diabetes®, a dodgeball tournament that has grown from the inaugural event’s 12 teams in 2005 to the more than 30 that participated this past March. Irwin notes, “We hope to continue to raise our profile in the D.C. area to attract more organizers, more sponsors and more supporters — and to inspire others to create their own unique events to raise money for diabetes research and treatment!”

Elizabeth and Anna are also proud to have achieved Silver Certification from the Council for Responsible Sport, having composted or recycled 91% of the waste from the event, supported local businesses, served local food and reduced the carbon footprint by planting trees. Participants also wore organic shirts and were awarded recycled trophies. You can read more about Elizabeth and Anna’s first “green” Dodging Diabetes® tournament at www.dodgingdiabetes.org/going-green/ or follow them on Twitter @dodgingdiabetes.
Reflections from Joslin’s Youth Ambassador

“Meeting and speaking with Joslin Medalists has been a major source of inspiration for me.”

Youth Ambassador Danielle Handler, joined by her parents Dr. Wendy Handler and Dr. Lawrence Handler, is honored with a service award from Joslin President and CEO John L. Brooks III at the 27th Evening at Pops event.

Danielle Handler was appointed Joslin Youth Ambassador at the 2011 High Hopes Gala when she was a senior at Newton North High School. For the past four years, she’s taken an active role in promoting diabetes awareness and Joslin’s role as global leader in the field.

Not one to be easily defeated, Danielle demonstrates a resilience and ability to make adjustments in her diabetes management that only those living with a chronic illness can appreciate. When asked about how she fared on recent trips to Spain and Israel—Danielle loves to travel—she responds, “Managing my diabetes overseas came with an array of challenges. To name a few, the time change, irresistible desserts, a different diet, variability in meal times...I was forced to adapt to it all, however, my Joslin team was there for me the whole time, helping me prepare for my transition and even supporting me while overseas.”

A varsity tennis and cross-country skier in high school, Danielle will spend her third summer as a counselor (after four years as a camper) at The Barton Center for Diabetes Education, an overnight camp for girls with type 1 diabetes. She begins her second year at Brown University in the fall.

At the 2013 Evening at Pops event, John Brooks presented Danielle with an award for her service, noting her inspiring presence on the Joslin scene. For as much as she’s given others, Danielle has met her own role models as Youth Ambassador adding, “I love talking to patients of all ages, but meeting and speaking with Joslin Medalists has been a major source of inspiration for me.” Joslin couldn’t ask for a better Youth Ambassador who demonstrates in all that she does that she’s in charge of her diabetes, not the other way around. Thank you, Danielle.

Noel Davis and Ena E. Godfrey Research Fund
Established in 1990 to provide facilities for Joslin’s Education Division.

William Richardson Dewey Memorial Fund
Established in 1984 to help Joslin in its many efforts to eliminate diabetes.

Diabetes Research and Wellness Foundation Chair
Established in 2000 for continued research into leuk cell transplantation.

Giovanni Ferrante di Ruffano Endowment Fund
Established in 1997 to support the activities and programs of Joslin.

Dlugos Family Fund
Established in 2000 by George and Judith Dlugos for unrestricted support.

Charles and Molly Downer Family Fund
Established in 2002 to support Joslin at the discretion of the President and the Board of Trustees.

Steve and Rhonda Downey Campership Fund
Established in 1997 to support Joslin’s Pediatric, Adolescent and Young Adult Program who has guided her care throughout her 11 years as a patient. “The support I receive is personal and ongoing,” she offers. “My nurses are constantly encouraging me to e-mail my blood sugars for further review after making changes or during difficult periods. I’ve received wonderful care from Dr. A sne Bicker and my diabetes educator, Ashley Atkins.”

Danielle was appointed Joslin Youth Ambassador at the 2011 High Hopes Gala when she was a senior at Newton North High School. For the past four years, she’s taken an active role in promoting diabetes awareness and Joslin’s role as global leader in the field.

Not one to be easily defeated, Danielle demonstrates a resilience and ability to make adjustments in her diabetes management that only those living with a chronic illness can appreciate. When asked about how she fared on recent trips to Spain and Israel—Danielle loves to travel—she responds, “Managing my diabetes overseas came with an array of challenges. To name a few, the time change, irresistible desserts, a different diet, variability in meal times...I was forced to adapt to it all, however, my Joslin team was there for me the whole time, helping me prepare for my transition and even supporting me while overseas.”

A varsity tennis and cross-country skier in high school, Danielle will spend her third summer as a counselor (after four years as a camper) at The Barton Center for Diabetes Education, an overnight camp for girls with type 1 diabetes. She begins her second year at Brown University in the fall.

At the 2013 Evening at Pops event, John Brooks presented Danielle with an award for her service, noting her inspiring presence on the Joslin scene. For as much as she’s given others, Danielle has met her own role models as Youth Ambassador adding, “I love talking to patients of all ages, but meeting and speaking with Joslin Medalists has been a major source of inspiration for me.” Joslin couldn’t ask for a better Youth Ambassador who demonstrates in all that she does that she’s in charge of her diabetes, not the other way around. Thank you, Danielle.
Established in 2000 through a bequest by Leonard C. Eaton to support the activities of the Elliott P. Joslin Camp.

Melvin Kirsich Memorial Fund
Established in 1992 to help people with diabetes who are in need of kidney dialysis.

Edward R. Koller, Sr., Family Campership Fund
Established in 1987 to provide campership support to needy young people.

Karen Ann Kovarek Memorial Fund
Established in 1995 in loving memory of Karen Kovarek by her family and friends, to support patient education programs.

Leo Krall International Diabetes Care and Education Fund
Established in 2001 to recruit, develop, and train diabetes professionals both at Joslin and through events around the world.

Ray A. and Robert L. Kroc Lectureship
Established in 1985 to fund visiting lecturers in the Joslin Research Laboratory.

Hilda Leichter Research Fund
Established in 2001 through a bequest to support research for the study of cure and cure of diabetes.

Leighton-Oare Fund
Established in 1992 to support diabetes research.

Maurice and Pearl Londin Fund
Established in 2000 through a bequest by Pearl Londin to support the activities and programs of Joslin.

Gladys Longo Education Fund
Established in 1984 to fund educational programs for teenagers with diabetes.

Loring Research Fund
Established in 1994 by Arthur and Vicki Loring, with income to be used at the discretion of the President and Director of Research, preferably to study complications resulting from type 1 diabetes.

Mary E. Lovejoy Campership Fund
Established in 1983 for the creation of a permanent campership at the Elliott P. Joslin Camp.

Bettina Gwarthwaite Lowerr Endowment Fund
Established in 1998 through a bequest from Bettina Gwarthwaite Lowerr to support the activities and programs of Joslin.

Lucas Fund
Established in 2001 to support research at the discretion of the President and Board of Trustees.

Beth Z. Lurier Memorial Research Fund
Established in 1996 to support research in the Elliott P. Joslin Laboratory.

Herman P. Lutz Fund
Established in 2000 through a bequest of Ann Lutz in honor of her husband, Herman P. Lutz, for unrestricted support.

Catherine T. Sullivan Luz Memorial Fund
Established in 1994 by the family of Catherine T. Sullivan Luz to support the Bethune Eye Institute at Joslin.

Marlyn Lynch Fund
Established in 1999 in memory of Marlyn Lynch, a courageous Joslin patient, to support diabetes research, education, treatment programs at Joslin, preferably in the area of ophthalmology.

Jeffrey R. Martin Memorial Fund
Established in 1996 by the Martin family to support patient education projects.

Virginia May Memorial Fund
Established in 1995 in memory of Virginia May, a courageous Joslin patient, to provide support for research, education, treatment, and programs at Joslin, preferably in the area of nephrology.

Peter and Carolyn Lynch Research Fund
Established in 1991 to support research in immunology and immunogenetics.

Ruth MacDuff and Bonnie Foister Fund
Established in 1999 through bequests from Ruth MacDuff and her daughter, Bonnie Foister, to support the research programs of Joslin.

Lillie A. Magrill Memorial Fund
Established in 1996 by the generous bequest of Lillie A. Magrill to support the work of Joslin.

The Jennie and Ezra G. Manheim Memorial Endowment Fund
Established by Stella Nieland and Miriam R. Kugler in loving memory of their parents to support the ongoing work of Joslin Diabetes Center.

Manopoli Fund
Established in 1999 by Jane Manopoli in honor of her grandmother to support pediatric programs.

Alexander Marble Library Endowment
Established in memory of former Joslin President Dr. Alexander Marble and his wife Beula, a pioneer in diabetics, by family, staff, alumni and friends of Joslin, to support programs for the Alexander Marble Library.

Peter T. Marinello Fund
Established in 1992 by his parents, family, and friends, this fund provides scholarships to attend the Elliott P. Joslin Camp. The fund was created to ensure that boys with diabetes continue to benefit from the unique living and learning experience at the Camp.

Marshall Family Research Fund
Established in 1996 by David and Cynthia Marshall and their family to support diabetes research at Joslin, preferably in the area of islet transplantation.

Jeffrey R. Martin Memorial Fund
Established in 1996 by the Martin family to support patient education projects.

Virginia May Memorial Fund
Established in 1995 in memory of Virginia May, a courageous Joslin patient, to provide support for research, education, treatment, and programs at Joslin, preferably in the area of nephrology.

Peter and Carolyn Lynch Research Fund
Established in 1991 to support research in immunology and immunogenetics.

Ruth MacDuff and Bonnie Foister Fund
Established in 1999 through bequests from Ruth MacDuff and her daughter, Bonnie Foister, to support the research programs of Joslin.

Warren L. McEachan Diabetes Research Fund
Established in 1989 to support an outstanding camper at Camp Joslin.

Robert Peatfield Camp Scholarship Fund
Established in 1990 to support Camp Joslin and camperships.

Claude W. Scheuer Youth Program Fund
Established in 2000 to support youth education programs at Joslin.

Schoenheimer Family Research Fund
Established in 1999 through bequests from the Audrey, Helen C., and Luis C. Schoenheimer Trusts to be used for research purposes.

The Ruth and Carl J. Shapiro Medical Director’s Fund
Established in 2004 to support the activities of the Joslin Clinic Chief Medical Officer.

Abraham B. Sharpe Fund for Education and Clinical Research
Established in 1987 to support clinical research to increase the length and quality of life in patients with diabetes, support communication of the results of such research to patients and their families, and support training of personnel appropriate to those objectives.

Agnes and Phillip Nuzzo Memorial Fund
Established in 1988 to support diabetes research.

Mary E. Lovejoy Campership Fund
Established in 2000 to annually support a Joslin Diabetes Center.

Lawton Memorial Fund
Established in 1994 through a bequest by Robert G. Spiro, M.D., a long-time Joslin patient and recipient of the Joslin 50-Year Medal, as well as a Senior Investigator at Joslin Diabetes Center.

Sorokin Fund
Established in 1998 to support research into the causes and cure of diabetes.

Marguerite P. Roche Fund
Established in 1992 to be used for research into the causes and cure of diabetes.

Marathon Family Research Fund
Established in 1996 to support the Board of Trustees, as they shall deem advisable, to carry out the Center’s programs with the hope that preference would be given to the needs of the research director.

Mary Joslin Otto Fund
Established in 2000 to make contributions for scientific and research purposes.

Alice L. Sabeau Fund
Established in 2000 through a bequest from Alice L. Sabeau to support the activities and programs of Joslin Diabetes Center.

Abraham Parkoff Research Fund
Established in 1999 by Dr. Abraham Parkoff in recognition of care given by Dr. Alexander Marble. Income of the fund is to support research in type 1 diabetes.

Patton Memorial Fund
Established in 1998 for unrestricted support.

Robert Peatfield Camp Scholarship Fund
Established in 1990 to support Camp Joslin and camperships.

Laurine K. Smith Fund
Established in 2000 through a bequest by Laurine K. Smith to support research programs.

Lawton Memorial Research Fund
Established in 1997 by the family of Lawton Smith to support type 1 diabetes research.

Sven Smith Research Fund
Established in 2001 by the family of Sven S. Smith, to provide support for research to find a cure for type 1 diabetes.

Dr. J. Stuart Soeldner Scholarship Fund
Established in 1986 in honor of long-time Joslin researcher and endocrinologist, Dr. J. Stuart Soeldner, to provide scholarship support to students and fellows involved in diabetes care and research.

Milton and Ethel Silver Sarokin Fund
Established in 1992 to support research activities.

Robert G. Spiro, M.D., Endowed Campership Fund
Established in 1998 to support young people who attend the Elliott P. Joslin Camp by Robert G. Spiro, M.D., a long-time Joslin patient and recipient of the Joslin 50-Year Medal, as well as a Senior Investigator at Joslin Diabetes Center.

Saroly Foundation Fund for Healthy Living
Created in 2005 in support of Joslin’s Center for Innovation in Diabetes Education to further the research and development of educational curricula that will improve the lives of people with diabetes.

Marcia A. Talbot Endowment Fund
Established in 2000 to support youth programs.

Beatrice J. Toi Memorial Research Fund
Established in 1998 to support diabetes research.

Margaret Rose Turnbull Fund
Established in 1999 through a bequest by Margaret Rose Turnbull to support the research activities and programs of Joslin.

Angela DeNicola Verrastro Memorial Fund
Established in 1999 by her family and friends to support the ongoing work of Joslin.

Gloria Vicedomini Fund
Established in 1998 through a bequest from Gloria Vicedomini to support research programs.

Nancy Carpenter Walker-Rose Campership Fund
Established in 1993 in memory of Nancy Carpenter Walker-Rose by her parents, Jane and Fred Carpenter, to provide a camping experience at the Elliott P. Joslin Camp for deserving children.

Mabel A. Welch Fund
Established in 2001 through a bequest by Mabel A. Welch to support the research activities and programs of Joslin.

Kathleen P. Welch Fund
Established in 2007 to provide research to explore if certain viruses address type 2 diabetes and women.

Agelen Wheaton Research Fund
Established in 1999 in memory of a bequest by Agelen Wheaton to support the research programs of Joslin.

Joyce and David Wilson Family Fund
Established in 2010 to support type 1 research through the High Hopes Fund.

The Lawrence and Evelyn Wing Family Lectureship Fund
Established in 2012 by Laura, Linda and Lewent Wing and Family in honor of their parents to fund an annual lecture in support of the Asian American Diabetes Initiative (AADI).

Marion Wing Campership Fund
Established in 1991 through the estate of Marion Walters Wing to provide scholarships for boys attending the Elliott P. Joslin Camp to help them deal more effectively with diabetes.

Alexander Wolf Memorial Fund
Established in 1999 through a bequest by Alexander Wolf for the unrestricted support of Joslin.
Paul C. and Martha K. Wolff Fund
Established in 1998 through the bequests of Paul C. and Martha K. Wolff to support the activities and programs of Joslin.

WorldPath Foundation Fund for Clinical Research
Established in 2002, to be used for clinical research and care for both adult and childhood diabetes.

Jacob Y. and Gladys G. Young Fund

Priscilla’s White Society
Creating Your Joslin Legacy

“I’ve received so much help over the years from Joslin, why wouldn’t I give back?”

When Stephanie Brett-Bell received a diagnosis of type 1 diabetes in 1962, little did she know the extent to which her future would be shaped by one of the major historical figures in 20th century diabetes care.

“Dr. Priscilla White became my role model. She had high expectations of her patients – everyone admired her and we all wanted to measure up,” notes Stephanie.

Now a 50-Year Medalist with a long and successful career in clinical social work, Stephanie has chosen to honor the legacy of her role model by creating an estate gift.

“I want others to be influenced by those same high expectations. Joslin is the best place for anyone to go for their diabetes care. I think Dr. White would have been proud of me.”

Joslin's experienced staff can help you structure an estate gift that best supports your needs. To learn more about how you can make an impact on Joslin care, please contact:

There are many ways you can support Joslin Diabetes Center

Supporting Joslin is easy. And it’s gratifying, too! To make a gift, simply choose one of the options below or visit Joslin.org and click on the “Support Joslin” tab.

All charitable gifts are tax-deductible as allowed by law.

* Give online at www.joslin.org through our secure donation page. A gift to Joslin of $1,000 or more entitles you to membership in the Elliott P. Joslin Society.

* Send a check to Joslin Diabetes Center, Development Office, One Joslin Place, Boston, MA 02215.

* Make a gift of appreciated securities.

* Join The Priscilla White Society by including Joslin in your will or estate plan or by establishing a life-income gift.

* Commemorate a special loved one with a tribute gift to the High Hopes Fund to honor someone important to you, remember the life of a loved one, or add a personal touch to an important event or milestone.

* Plan an event to benefit Joslin and work with our events team to make it successful!

* Become a member of Team Joslin and compete in athletic events to raise money for Joslin.

* Attend one of Joslin’s signature events which include A Spoonful of Ginger, the High Hopes Gala, An Evening at Pops and ritmos de salud.

* Become a corporate sponsor and help individuals with diabetes through a variety of cause-related marketing offerings.

* Have your company match your contribution and double your gift. Check our registry of companies that offer matching gift programs to see if your company qualifies.

For more information, please call Joslin’s Development Office at (617) 309-2412 or go to www.joslin.org
